

Hao Li

recognized by MIT's
Technology Review
as one of the world's
top young innovators

TR-35

USC Viterbi

The USC Viterbi School of Engineering congratulates Hao Li, Assistant Professor in the Department of Computer Science, for being included in the MIT Technology Review's list of the top 35 young innovators in the world under the age of 35.

Dr. Li's work focuses on algorithms for 3-D motion capture and animation, with applications in the film industry as well as in medicine, where, for example, it can be used to model the human heart or cancerous tumors.

Since 2009, seven USC Viterbi junior faculty members have been selected as TR 35 young innovators, more than any other engineering school in the world.
