

Jong-Shi Pang

Epstein Family
Professor of
Industrial and
Systems Engineering

USC Viterbi

The USC Viterbi School of Engineering is pleased to welcome Dr. Jong-Shi Pang as a new Epstein Family Professor of Industrial and Systems Engineering in the Daniel J. Epstein Department of Industrial and Systems Engineering.

Pang's work falls into the realm of equilibrium programming, a form of optimization that uses mathematical algorithms to facilitate efficient system design, which helps companies make the best decisions with basic operations, such as manufacturing, production, pricing and more, often in the presence of competition.

"USC is at the leading edge of knowledge in these areas, and I am happy to be a part of it," said Pang.
