USC Viterbi

Congratulations to

# MING HSIEH

newly elected to the

# NATIONAL ACADEMY OF ENGINEERING

# MING HSIEH

The USC Viterbi School of Engineering warmly congratulates Ming Hsieh, electrical engineering alumnus (BS '83, MS '84) and USC Trustee, elected to the National Academy of Engineering, one of the highest professional honors accorded an engineer.

Ming Hsieh founded AMAX Information Technologies, a computer server and storage systems company, in 1985 and in 1990 founded the Pasadena-based Cogent Inc., which revolutionized automated fingerprint identification. He is currently the President and Founder of Fulgent Therapeutics.

In 2006, Hsieh endowed the USC Viterbi Department of Electrical Engineering, which now carries his name. In 2010 Hsieh established the Ming Hsieh Institute for Engineering Medicine for Cancer, that supports research at the Intersection of engineering, medicine and science in the quest to cure cancer.
