

USC Viterbi

Dong Song

awarded a 2018
Society for Brain Mapping
and Therapeutics

Young Investigator Award

The USC Viterbi School of Engineering congratulates **Dong Song**, research associate professor in the Department of Biomedical Engineering, for receiving a Society for Brain Mapping and Therapeutics (SBMT) **Young Investigator Award**.

Dr. Song's main research interests include nonlinear systems analysis of the nervous system, cortical neural prosthesis, electrophysiological mechanisms of learning and memory formation, and development of novel modeling techniques incorporating both statistical and mechanistic modeling methods

Song is among two scientists selected to receive this highly competitive award, which supports outstanding early-career scientists and academics.
